MF-Eco HEPA with Jet-Pulse Cleaning

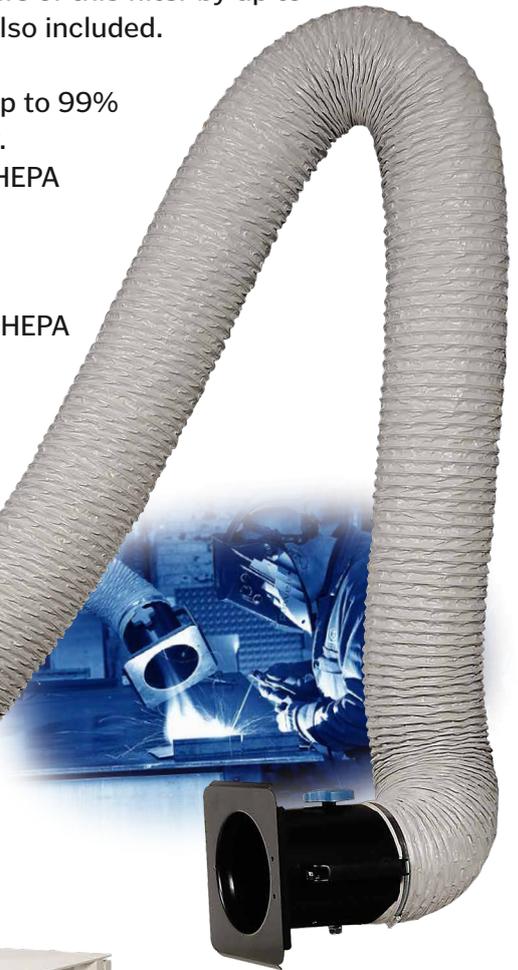

Mobile Weld Fume & Light Grinding Dust Filtration Unit (H13/W3)

The new 2020 MF-Eco HEPA is a mobile weld fume/light grinding dust extractor with a built-in Jet-Pulse Cleaning System. This provides quick and easy cleaning of the primary cartridge filter (when connected to a compressed air supply) and greatly increases the life of this filter by up to 100 times. To protect the filters from sparks, a spark deflection plate is also included.

With a new two stage filtration system, the primary cartridge filter has up to 99% efficiency and the main HEPA filter has over 99.95% (H13/W3) efficiency. The 1.1kW motor extracts over 1000m³/h through the hood, the MF-Eco HEPA is a cost effective solution to all of your weld fume/light grinding dust extraction requirements.

Supplied with a super flexible 3 metre Flexi Extractor Arm, internal filter, HEPA filter and hood, just plug-in, switch on and you're ready to weld/grind. Available in 110V & 240V.

- Simple to operate
- Supremely versatile
- 3 metre Flexi-Arm
- Over 1000m³/h
- Easy to maintain
- HEPA H13/W3
- Spark deflection Plate
